TWENTY-NINTH ANNUAL REPORT

To The Governor of Montana

The Honorable

TIM BABCOCK

ON

Employment Security In Montana

FOR THE FISCAL YEAR ENDING JUNE 30, 1965

UNEMPLOYMENT COMPENSATION
COMMISSION OF MONTANA

Unemployment Compensation Commission of Montana

HELENA, MONTANA

December 1, 1965

Honorable Tim Babcock
Governor of Montana
Helena, Montana

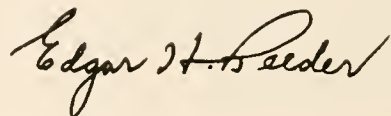

Dear Governor Babcock:

A summary of employment and unemployment programs of this Commission is presented in the following pages. This, the twenty-ninth in a series of annual reports, is submitted in accordance with the requirements of Sections 87-120 and 87-122, Revised Codes of Montana, as amended.

Employment and unemployment in Montana is never static. Both move up and down in response to a variety of economic and climatic conditions. It naturally follows that the Commission always has work to do and services to offer to all the people of Montana in the manpower field.

We gratefully acknowledge the interest and cooperation extended this Commission by your office, the UCC Advisory Council, and the general public.

Respectfully submitted,

A handwritten signature in black ink, reading "Edgar H. Reeder". The signature is written in a cursive style with a large, stylized "E" and a long, sweeping underline.

DECLARATION OF STATE PUBLIC POLICY

**The following statement of policy constitutes the introductory paragraph
of the Montana Unemployment Compensation Law.**

87-102. As a guide to the interpretation and application of this act, the public policy of this state is declared to be as follows: Economic insecurity due to unemployment is a serious menace to the health, morals, and welfare of the people of this state. Involuntary unemployment is therefore a subject of general interest and concern which requires appropriate action by the legislature to prevent its spread and to lighten its burden which now so often falls with crushing force upon the unemployed worker and his family. The achievement of social security requires protection against this greatest hazard of our economic life. This can be provided by encouraging employers to provide more stable employment and by the systematic accumulation of funds during periods of employment to provide benefits for periods of unemployment, thus maintaining purchasing power and limiting the serious social consequences of poor relief assistance. The legislature, therefore, declares that in its considered judgment the public good and the general welfare of the citizens of this state require the enactment of this measure under the police powers of the state for the compulsory setting aside of unemployment reserves to be used for the benefit of persons unemployed through no fault of their own.

Fiscal 1965 In Review

EMPLOYMENT SERVICE ACTIVITIES

Jess C. Fletcher, Director

Matching workers and jobs continues to be the primary mission of the employment service, but its responsibilities have been broadened in recent years. New programs relating to manpower training, youth, and labor mobility has added to its responsibilities. Employment service functions help employers, job-seekers, and community leaders make employment decisions and solve manpower problems. They cover the wide range of the totality of manpower—recruiting, interviewing and screening of workers for proper job placement, employer relations and job development, employment counseling and testing, special applicant services to veterans and older workers, job market services to youth, manpower training under the Manpower Development and Training Act, gathering, analyzing and disseminating labor market information, and unemployment insurance services.

WORKER REGISTRATION: During the Fiscal Year 1965, the twenty-two local offices of the Montana State Employment Service interviewed, registered, and classified occupationally a total of 50,360 job-seekers, approximately 400 more than in the previous fiscal year. In the total were 18,549 women and 7,308 veterans. Professional registrants of 806 with the Teacher Placement Division and 1,398 young workers who contacted the Youth Opportunity Center in Billings are also included in the total.

INDUSTRIAL JOB PLACEMENTS: Job orders received from the state's industrial employers resulted in the placement on jobs of 33,672 non-farm workers during fiscal, 1965, up 1,257 from the prior fiscal year. Trade industries topped all others in job placements with a total of 9,106 workers added to payrolls. Job placements in other industries were in this order: service industries, 5,934; manufacturing, 4,473; private households, 4,391; construction, 3,008; government, 2,854; public utilities and railroads, 2,362; finance, insurance and real estate, 769; mining, 693; and forestry and fishing, 82. Employer relations representatives of local employment offices made 17,579 visits to industrial employers in the interest of job development, referral and placement activities. Employers listed 40,785 job openings with local employment offices during Fiscal 1965, up 2,666 from Fiscal 1964.

AGRICULTURAL PLACEMENTS: The Farm Placement Division of the Montana State Employment Service provides basically the same service to agricultural employers and farm workers as those offered to non-farm employers and workers. The primary objective is to provide sufficient workers at the right time and right place to plant, harvest and process

crops grown in the state. During this fiscal year, 32,035 workers were placed in a variety of farm activities, a decline of 2,287 from Fiscal 1964. The termination of Public Law 78 which previously permitted importation of foreign workers during heavy work seasons in agriculture apparently had little effect on the Montana farm front. Sufficient supplies of domestic labor were available to meet farm labor demands.

EMPLOYMENT COUNSELING AND TESTING:

Many job applicants bring to local employment offices problems of vocational choice or job adjustment. This special group of applicants may find solutions to their problems through vocational guidance or job counseling services. New entrants to the labor market, youth, older workers, physically limited workers, and others displaced from their jobs through automation or new technology may all benefit from counseling services. Local employment office personnel conducted 18,909 counseling interviews during Fiscal 1965 including 8,504 women and 1,883 veterans.

Important tools used in the counseling process and in the referral and placement of workers to the right jobs include the use of both aptitude and trade tests. To measure capacity for learning various jobs, work applicants are given a combination of tests called the General Aptitude Test Battery. To measure a worker's ability in learning to perform various specialized jobs, specific aptitude tests are used. Proficiency tests, including typing and shorthand, measure an applicant's skill and knowledge in these fields. Occupational testing has been on the increase as more employers are made aware of the fact that pre-tested job applicants are more qualified to meet specific job requirements. During the year, local employment office personnel tested 7,176 applicants in general aptitudes, 3,379 in specific aptitudes, and 5,852 in proficiency.

EMPHASIS ON YOUTH: The job problems of youth have been of major concern in recent years. While non-farm employment climbed to record breaking levels during Fiscal, 1965, most of the new jobs generated by an expanding economy were filled by adult workers. The number of unemployed youth continued to increase. The problems created are serious for growing numbers of untrained and inexperienced young people are competing for jobs in the wake of a steadily shrinking demand for unskilled workers both in industry and on the farm. New programs and new facilities to help and guide the young unemployed workers were in progress during Fiscal, 1965. The first Youth Opportunity Cen-

ter in Montana opened in Billings on March 16, 1965. The purpose of the Center, an operating arm of the Montana State Employment Service, is to increase the employability of all young people between 16 and 22 with a special emphasis on those disadvantaged. Here, counseling, testing, occupational and labor market information, and training plus individualized job development, referral and placement attempts to help the young worker find a meaningful place in society.

On May 23, 1965 a national "Youth Opportunity Campaign" to provide work and training experience for as many young people as possible during the summer months was launched. Montana's participation in this special promotion proved successful as 696 employers responded with 2,871 youth job openings. A total of 8,410 young people registered for employment during the campaign period. Other special activities concerning youth included recruitment of teams for agricultural work, Neighborhood Youth Corps, and the enlistment of 99 young people in Job Corps Camps throughout the United States. Three Job Corps Camps are currently under construction in Montana: Trapper Creek Camp, Darby; Kicking Horse Camp, Polson; and Foster Creek Camp, Anaconda. Each is a rural camp and will accommodate about 200 enrollees when ready for operation late this year.

MANPOWER DEVELOPMENT AND TRAINING. The Manpower Development and Training Act of 1962, signed into law on March 15, 1962, sets up a nationwide federal program to provide basic education, prevocational, and on-the-job training for unemployed and underemployed persons, age 16 and over. Training under the Act was designed to provide workers with new skills where needed, to upgrade present skills and to meet the job needs of

workers displaced by automation, technological changes, geographical relocation of industry and shifts of market demands.

Training is available for all unemployed or underemployed persons, age 16 and over. For those people eligible, there are training, subsistence and transportation allowances available during the period of training. In most cases, openings must be available or anticipated in the area before the course is established. Persons to be trained must have a reasonable expectation of employment in such openings or must give reasonable assurance of willingness to accept employment outside the area of their residence.

The State Employment Service is responsible for labor market surveys and job analyses in order to point out shortages of occupations and training needs. They are also responsible for the screening and selection of trainees and the placement of these trainees upon completion of the training. The payment of allowances and counseling during the training program is also the responsibility of the Employment Service.

The Montana State Department of Public Instruction, under the direction of the Department of Health, Education and Welfare, is responsible for the actual training.

The Montana State Employment Service began training workers under the Manpower Development and Training Act in November, 1962 and since that time, through Fiscal 1965, have conducted 61 training projects, of which 5 are still in progress.

A total of 1,008 have entered training classes, of which 787 satisfactorily completed and, at present, 101 are enrolled in current training programs. Of those trainees completing training, a total of 651 persons were placed in training related jobs.

UNEMPLOYMENT INSURANCE ACTIVITIES

Donald R. Merritt, Director

Montana's Unemployment Compensation Commission combines the twin system of a public employment agency with a job insurance program to compensate workers for loss of income during terms of unemployment. Employment placement services are available to all employers and jobseekers, but unemployment insurance coverage applies generally to those workers whose employers have a total annual payroll within either the current or preceding calendar year which exceeds the sum of five hundred (\$500.00) dollars. Smaller firms and organizations in certain types of exempted activities are not covered by the law and their employees do not have unemployment insurance coverage.

Unemployment insurance payments to eligible unemployed workers come from a trust fund built up by contributions from employers subject to the Mon-

tana UCC law. A quarterly payroll tax is paid on the first \$3,000.00 in wages earned by each employee during the year. Workers do not pay any part of the Montana tax and employers can make no payroll deductions for this purpose.

Unemployment insurance payments strengthen the state's economy by providing a temporary and partial replacement of income when wage earners lose their jobs. These payments not only help to conserve the state's supply of skilled workers by giving them a chance to look for work in Montana, but also help to sustain purchasing power in the community.

EMPLOYER COVERAGE AND CONTRIBUTIONS:

The average number of subject employers who reported wages of insured workers to the Commission during Fiscal, 1965 was 16,143. The total was up 100

from Fiscal, 1964. The number changed from month to month as new employers became subject to the law and others terminated their liability. During Fiscal 1965 employers paid tax contributions amounting to \$5.4 million, an increase of \$242,000 from the prior fiscal year. These payments were set aside exclusively for the payment of unemployment benefits to eligible, unemployed workers. Penalty and interest on delinquent accounts amounted to \$15,234.00. All of the tax collections were deposited to the credit of Montana in the United States Treasury, and earned interest of \$658,445.00 during the year. Tax contributions are paid by each active insured employer at rates ranging from the minimum of 0.5 per cent to a maximum of 2.7 per cent depending upon each individual employer's experience under the law. The average tax yield rate is set by law at 1.5 per cent.

COVERED EMPLOYMENT AND WAGES: The average of workers insured under the law increased 2,241 from Fiscal 1964 to a total of 115,124 for Fiscal 1965. Trade industries headed the list with an average of 42,214 workers. Next in order were Manufacturing, 21,783; Service, 14,982; Contract Construction, 11,567; Transportation, Communications, and Utilities, 9,789; Mining, 7,456; and Finance, Insurance and Real Estate, 6,693. Gross wages reported by covered employers during the same period amounted to \$564.4 million. This was an increase of \$27.2 million over Fiscal, 1964. Taxable wages upon which UCC contributions were paid came to \$352.2 million, up \$12.3 million from Fiscal, 1964. The highest total of gross wages reported was in trade industries with a payroll of \$171.9 million. Wages paid to manufacturing workers were second with a total of \$128.7 million. Next in order were Contract Construction, \$75 million; Transportation, Communications and Utilities, \$57.4 million; Mining, \$49 million; Service, \$47.9 million; and Finance, Insurance and Real Estate, \$32.5 million.

UNEMPLOYMENT INSURANCE CLAIMS AND PAYMENTS: During the 1965 Fiscal year a total of 24,966 unemployed workers filed initial claims for jobless benefits under the Montana UCC law. This was a decrease of 6,695 from Fiscal, 1964. Of the total initial claims 21,120 were determined monetarily eligible while 3,846 were ineligible because of insufficient wage credits. A total of 235,307 continued or weekly claims were filed, down 34,500 from Fiscal 1964. The weekly average number of payments was 4,040 and the weekly average benefit amount figured to \$31.54. A total of 17,060 unemployed workers received the first benefit check and 4,838 drew out the maximum entitlement. March, 1965 was the heaviest month of payments when 35,606 benefit checks totalling \$1,123,826 were written. Claims were at the low point in October, 1964 when 6,728 unemployment insurance checks totalled \$202,557.

CLAIMS AND PAYMENTS—OTHER PROGRAMS:

Most of the claims and payments processed through the Montana Unemployment Compensation Commission are against the Montana UCC trust fund. The Commission, however, acts as agent for the federal government in accepting the claims of and making payments to unemployed federal civilian workers and ex-servicemen. Payments of such claims are from federal moneys and not from the Montana trust fund. During Fiscal, 1965 unemployed federal civilian workers filed 17,349 claims for a total of \$548,522. Claims filed by unemployed ex-servicemen numbered 10,271 with benefit payments amounting to \$324,341. Payments in both programs were down from Fiscal, 1964.

MONTANA UCC TRUST FUND: The Montana trust fund contained a balance of \$18,073,626 when the fiscal year ended on June 30, 1965. Unemployment insurance payments made to unemployed workers exceeded employer tax contributions by \$1.2 million. The Montana law provides that should the trust fund at any time in the future fall below and remain below \$18 million continuously for one year, employer tax rates will be so arrayed as to yield an average of 2 per cent of insured payrolls. This rate would remain in effect until the trust fund exceeded \$26 million at which time the average tax yield rate of 1.5 per cent would return. Should the trust fund remain below the \$18 million mark continuously for two years, a uniform tax rate of 2.7 per cent would apply to all covered employers until the fund exceeded the \$26 million level when the 1.5 per cent average tax yield rate would again become effective.

BENEFIT APPEALS: Any interested party may appeal a determination of the Commission upon a claim for benefits or any determination of classification and tax rate. Two appellate bodies, the Appeals Tribunal and the Commission, are set up to hear and decide issues brought before them. An Appeals Tribunal decision may be appealed to the Commission. A Commission decision is the final administrative remedy. Within ten days after a decision of the Commission, an aggrieved party may start a district court action for judicial review. During Fiscal 1965, a total of 581 appeals were filed and 9 were withdrawn prior to hearing. The Commission heard 60 cases appealed from lower authority.

OVERPAYMENT AND FRAUD: Although alleged fraudulent claims and overpayments are small in relation to the total number of claims filed, the Commission maintains a continuous program for fraud prevention, detection, and control of overpayments. The program includes special investigations and post audits of matching claims filed against employer payrolls. During Fiscal 1965, prosecution was recommended to county attorneys throughout the state in 139 cases. There were 84 convictions and 2 acquittals. A total of \$21,200.20 in overpayments was recovered.
